CTEK LAUNCHES CT5 POWERSPORT CHARGER

With dedicated programs for all 12V lead-acid and lithium (12V LiFePO₄) battery types

Thrills, action, fresh air - loving powersport is easy - whether you're on land, sea, snow or ice. Vehicle performance is everything and at the heart of it all is the battery. Your battery needs to be charged to maximum capacity to deliver peak power performance every time your powersport vehicle is started.

To help people maximise their battery performance CTEK, a leading global brand in the care and maintenance of vehicle batteries, has launched the CT5 POWERSPORT charger, with dedicated programs for all 12V lead-acid and lithium (12V LiFePO₄) battery types.

This 2.3A, 12V battery charger has three key charging & maintenance stages to maximise the power and lifetime of the battery. It uses advanced technology to constantly monitor the battery's power and health and take action when required - so your powersport vehicle is always ready to go when you are. The CT5 POWERSPORT can be attached to the battery indefinitely if required without risk of over or under charging - so it's the ideal choice for many powersport vehicles that are placed in out of season storage for long periods of time.

The charger is easy to use and works with all powersport vehicle 12V lead-acid or lithium (12V LiFePO₄) batteries. Intended for unsupervised use, the CT5 POWERSPORT charger is simple to connect, spark proof and reverse-polarity protected to protect the user and also the battery. Furthermore, there is no need to disconnect the battery before use as it regulates mains voltage to protect any sensitive electrical equipment.

The CT5 POWERSPORT charger has three selectable charge programmes;
NORMAL: Charge programme for any powersport 12V lead-acid battery, including AGM
LITHIUM: Charge programme for 12V lithium batteries (LiFePO₄, Li-Fe, Li-iron, LFP)
RECOND : Charge programme for reconditioning of deeply discharged batteries lead-acid batteries

"At CTEK, we understand the importance of making sure that powersport vehicle batteries are charged and ready to go, even if they have been kept in storage for a long period of time."

said Jon Lind, CEO at CTEK. "Our new CT5 POWERSPORT charger has been developed to charge and maintain powersport vehicle batteries in a way that will maximize battery performance and extend battery life by up to three times."

The CT5 POWERSPORT charger is easy to use, fully automatic, requires no specialist knowledge for use and is supplied with crocodile clips and eyelet connectors for maximum convenience. Additional accessories such as a wall mount, extension cable and bumper are also available to purchase separately. This quality, tough & durable unit comes with a five year warranty. ABOUT CTEK

- CTEK SWEDEN AB is a leading global brand in the care and maintenance of vehicle batteries. CTEK's unparalleled knowledge, and continuous investment in innovation, means they push the boundaries of research and development to bring new and unique battery charging technologies to the market.
- CTEK offers the market high-quality, reliable chargers and accessories that are effective, user friendly and, most importantly, safe (for the user, the vehicle electronics, the battery and the charger).
- With products and solutions for 6, 12 & 24V lead-acid & lithium (12V LiFePO₄) as well as Electrical Vehicle batteries, CTEK products are designed and tested to deliver maximum performance in a range of different situations.
- CTEK sells over one million battery chargers each year across the globe and regularly tops independent battery charger competitive tests.
- CTEK supplies chargers to the world's most recognized manufacturers including Audi, Bentley, BMW, Corvette, Ferrari, Jaguar, Maserati, McLaren, Mercedes, Porsche, and Rolls-Royce.
